

## ERROR LOG

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

I have encountered problems such as forgetting to save my PiggBank and adding its own private static void class name.

Before:

```
// Save the PiggyBank before quitting
savePiggyBank(piggyBank);

// Close the scanner
scanner.close();
}
```

After:

```
private static void savePiggyBank(PiggyBank piggyBank) {
    try (PrintWriter writer = new PrintWriter(new FileWriter(FILENAME))) {
        writer.println(piggyBank.getPennies());
        writer.println(piggyBank.getNickels());
        writer.println(piggyBank.getDimes());
        writer.println(piggyBank.getQuarters());
        System.out.println("Piggy bank saved successfully.");
    } catch (IOException e) {
        System.out.println("Error saving piggy bank: " + e.getMessage());
    }
}
```
