

Credit Name: File Structure
Assignment Name: WordCount

ERROR LOG

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

The only problem I encountered is if I didn't add the try statement for the Buffer Reader, it would not be accepted to make the program work.

```
try (BufferedReader reader = new BufferedReader(new FileReader(fileName))) {  
    String line;  
    while ((line = reader.readLine()) != null) {  
        String[] words = line.split("\\s+");  
        for (String word : words) {  
            word = word.replaceAll("[^a-zA-Z]", "");  
            if (!word.isEmpty()) {  
                wordCount++;  
                totalCharacters += word.length();  
            }  
        }  
    }  
}
```
