

Credit Name: Object Oriented Programming2

Assignment Name: UEmployee

REFLECTION ON CODE

How has your program changed from planning to coding to now? Please Explain?

My UEmployee was simple and straightforward. My code lets the user input their name and it will output their information.

```
private String name;
private double salary;

public UEmployee(String name, double salary)
{
    this.name = name;
    this.salary = salary;
}

public String getName()
{
    return name;
}

public double getSalary()
{
    return salary;
}
```
