Credit Name: Computer Science 3
Assignment Name: LocalBankGUI

REFLECTION ON CODE

How has your program changed from planning to coding to now? Please Explain?

LocalBankGUI was a challenging code to build. My code is quite different from my classmates because I tried to add my own touch to it. I built the code the way I was taught to code and it still gave me the same result. Interesting one to code because it tested our memory ability from computer science 20.
