ERROR LOG

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

An error I encountered gave me an unresolved compilation problem where I did not return the method as a result of an object type.

```
         --r        ..........,
         size++;
    }

    public Object pop()
    {

    }
```
